EDUCATION

App Academy - Immersive Full Stack Web Development Bootcamp
San Francisco State University - Bachelors of Science in Kinesiology

Sept 2022 - Mar 2023
Aug 2014 - May 2018

PROJECTS

Ballr

[Live Site](#) | [Github](#)

- Designed and developed a full stack web application similar to Flickr, enabling users to upload, search, and organize photos while implementing modular React components for enhanced scalability and maintenance, while leveraging AWS S3 for seamless user image uploading and scalable image services.
- **Tech Used:** *Python, Flask, SQLAlchemy, Alembic, Javascript, HTML, CSS, React, Redux, AWS, PostgreSQL*

Plantsy

[Live Site](#) | [Github](#)

- Developed a full stack web application similar to Etsy, allowing users to create products, search listings, leave reviews, and manage their cart. Collaborated with cross-functional teams, employing agile methodologies, and demonstrated strong debugging skills for successful implementation of both frontend and backend solutions.
- **Tech Used:** *Python, Flask, SQLAlchemy, Alembic, Javascript, HTML, CSS, React, Redux, PostgreSQL*

ChillinBnb

[Live Site](#) | [Github](#)

- Built a full stack web application resembling Airbnb, enabling users to view, create spots, leave reviews, and book accommodations. Utilized Sequelize, PostgreSQL, and Express to develop and test APIs for advanced features. Implemented Redux store for efficient data management and state synchronization, optimizing the user experience
- **Tech Used:** *Javascript, React, Redux, Sequelize, Express, PostgreSQL, HTML, CSS*

EXPERIENCE

General Contracting - Freelance

Mar 2020 - Mar 2022

- Accomplished numerous successful construction projects, including renovations and new constructions, by leveraging Microsoft Excel for precise project tracking and resource allocation, resulting in on-time and within-budget execution
- Coordinated subcontractors and clients, optimizing project execution through the utilization of Kanban boards that directly resulted in maximized productivity

Reimbursement Specialist - Genentech

Aug 2018 - Feb 2020

- Exceeded the daily target of 110% Benefit Investigations every month through efficient communication with health insurance companies across the U.S., utilizing Cisco's advanced calling features and Salesforce
- Enhanced efficiency and productivity by effectively communicating with customers, both internally and externally, while leveraging Microsoft Excel to track work data and maintain CRM opportunities

SKILLS

Programming Languages & Markup: Python, Javascript, HTML, CSS, SQL

Frameworks & Libraries: React/Redux, NodeJS, Express, Flask, Sequelize, SQLAlchemy, Alembic, PostgreSQL

Tools: Git, Postman, AWS, Docker, SCRUM
